

PRAJAPATI DEVASYA

Full-Stack Developer | React · Node.js · Python | AI/ML & Data Science Enthusiast

Ahmedabad, Gujarat, India | +91 6352471050 | devasyaprajapati2301@gmail.com

LinkedIn: www.linkedin.com/in/devasya-prajapati-76a8a63a2 | GitHub: <https://github.com/devasyaprajapati2301-stack>

PROFESSIONAL SUMMARY

Full-stack developer and B.Tech Computer Science & Engineering student with hands-on experience building web applications using React, Node.js, Express, and MongoDB, and machine learning projects using Python, Pandas, NumPy, and Scikit-learn. Has independently built and deployed multiple full-stack projects, including a healthcare appointment platform and an e-commerce application. Seeking Software Engineering, Full-Stack Development, or AI/ML internship opportunities.

TECHNICAL SKILLS

Languages: Python, JavaScript, Java, C, C++

Frontend: React, Tailwind CSS, Bootstrap, HTML, CSS, Vite

Backend: Node.js, Express.js, REST APIs

Databases: MongoDB, MySQL, SQL

Data Science / AI-ML: NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, EDA, Feature Engineering, Supervised & Unsupervised Learning, Regression, Classification, Decision Trees, Model Evaluation

Tools & Platforms: Git, GitHub, VS Code

PROJECTS

Health-Plus — Healthcare Appointment Management System | React, Node.js, Express, MongoDB

- Built a full-stack healthcare application enabling patients to book, reschedule, and cancel appointments through a responsive React interface.
- Developed CRUD-based REST APIs with Node.js and Express to manage appointment and patient records, backed by MongoDB for persistent storage.
- Designed a FIFO-based queue management system to handle appointment ordering and reduce scheduling conflicts.

E-Commerce Web Application | React, Node.js, Express, MongoDB

- Built a full-stack e-commerce platform with product catalog, shopping cart, and order management features.
- Implemented user authentication and designed RESTful backend APIs to handle product, cart, and order operations.
- Integrated MongoDB for persistent storage of product, user, and order data.

Sorting Algorithm Visualizer | React, JavaScript

- Developed an interactive DSA visualization tool that animates Bubble Sort, Merge Sort, and Quick Sort in real time.
- Implemented step-by-step execution logic in JavaScript to visually illustrate time-complexity differences between algorithms.

ML/Data Science Project — Exploratory Analysis & Predictive Modeling | Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn

- Built an end-to-end machine learning pipeline covering data preprocessing, exploratory data analysis (EDA), and feature engineering.
- Trained and evaluated classification/regression models using Scikit-learn, applying model evaluation techniques to compare performance.
- Used Pandas, NumPy, Matplotlib, and Seaborn to clean, analyze, and visualize datasets.

EXPERIENCE

Data Science Intern — Oasis Infobyte

Aug 2026 – Sep 2026

Information Technology Intern — Quarks System

Jul 2023 – Aug 2023

EDUCATION

Indus University

2025 – 2028 (Expected)

Bachelor of Technology in Computer Science & Engineering

Relevant Coursework: Database Systems, Operations Management, Business Software Development
